To all our established friends and customers over the world is due an explanation of a situation which developed during the early Spring of this year. And to those of you who are becoming acquainted with the GARDENS for the first time—an insight into what goes on "behind the scenes".

"The Big Freeze", which was a catastrophe to many growers, and a tremendous hardship to all, left its mark on us. It was directly responsible for three successive attacks of influenza which had me in bed for 10 weeks during one of our busiest seasons. My wife and son, who already had their share of responsibility, had to handle all the details and work that I oversee normally.

We kept a 24-hour-a-day vigil and maintained heat and circulating fans in our various storage buildings at top speed to protect the valuable stocks which you were, even then, planning on for your Spring plantings. In spite of our best efforts and the cooperation of loyal employees, bulbs and tubers froze, almost while we tended them. We immediately started writing, phoning and wiring to the better wholesale growers in this country and abroad in an effort to replace the choice items that were lost. Most of them, of course, had had the same experience. As a result, some of your orders were shipped late. In each case where we had to hold back a shipment in order to pack it according to our standard, we wrote a personal letter of explanation. Your response to these letters was very gratifying. We, in turn, are very grateful to those growers who divided their stocks with us to supply you with the exact planting stock you expect. We were also fortunate in being able to reciprocate by helping some of the other good suppliers in the same capacity.

We especially thank all of you who wrote such nice letters and cards and take this means, which is the only way we have, to thank you for your orders and your spirit of cooperation. We sincerely hope that you get as much pleasure from your bulbs and plants as we do growing them for you.

BULBS FOR ROCK GARDENS

Rockgardens, so popular the last few years, can be made much more attractive by the use of bulbs properly selected and planted. The dwarf plants such as Moss Phlox, Sedum, Thyme, Sempervivum and Dianthus are most colorful in May. If Crocus, Muscari, dwarf Iris, Leucojum, Miniature Daffodils, Species Tulips, and other bulbous varieties are used in the planting, blooms may be had beginning with the first spring day. A further extension of color may be obtained by using some of the dwarf varieties of Hemerocallis which flower in June and July. Deep well drained pockets of soil are required for planting the bulbs as most varieties need a rest period after blooming. They should be left undisturbed for years, and if happy, will soon establish themselves and afford a lovely picture in early spring.

Holly

Again this year we are justly proud to present our Holly and Assorted Christmas Greens. We grow and market the "French" strain of English Holly. This strain is, we believe, the finest grown. The leaves are heavy and dark green with a smooth waxy sheen. They resist drying and curling even after prolonged periods indoors. The bright red berries seem to sparkle in contrast to their dark background. Our Assorted Christmas Greens include native cedars, silvered salal, huckleberry and other evergreen sprays as well as cones and plain and variegated Holly.

This season, Holly will be marketed as follows:

HEMEROCALLIS—Daylilies

We are fortunate in now having over 200 varieties of Hemerocallis in sufficient quantity for distribution. At your request we will mail a complete descriptive listing of our exceptional collection.

Hemerocallis are becoming more and more popular now that flower gardeners are realizing how much color they can add to their garden with a minimum of care and expense. Hemerocallis thrives in any type of soil, in full sun or part shade.

No spraying or dusting is required as they have no pests, and the clumps need to be divided only every three or four years.

We know of no flowers that require so little care and give pleasure over such a long season. The roots may be planted at any time, although early fall or spring planting will give the best results. For the quickest effect plant in groups of three. Our Hemerocallis Bulletin will give you exact planting instructions.

The new pink, sulphur, red, orange and yellow shades are truly beautiful.

AURATUM (Gold-banded Lily) Top size bulbs: Each \$2.40

Large white bowl-shaped flowers are carried on stems 4 to 6 feet tall. Each of the six petals of the flower has a gold stripe down the center and is also heavily spotted with crimson. Has a wonderful fragrance. Blooms in August. These are hybrids from especially vigorous stock and free from virus diseases. American grown.

AURELIAN HYBRIDS Large bulbs: Each \$2.50

These grand Lilies are the result of many years of patient hybridization, selection and propagation by a Northwest Lily hybridist. Many thousands of crosses have been made resulting in a distinctly different and beautiful strain of trumpet and semi-trumpet Lilies in white, ivory, cream and sulphur tones.

BELLINGHAM HYBRIDS Each 75c, doz. \$7.50

These are hybrids from the crossings of many forms of west coast native lilies. All of them are handsome, brilliantly colored flowers in shades of yellow and orange.

CANDIDUM (Madonna Lily)

One of the oldest lilies in cultivation and one of the most popular. Because these lilies form a rosette of leaves in early fall they MUST be planted in late August or early September. Beautiful blossoms of pure white; blossoms upturned and many on a stem. Very fragrant. Blooming time late June. Order early.

Top Size Bulbs: Each 90c, Doz. \$9.00

Large bulbs: Each 70c, doz. \$7.00

Medium bulbs: Each 40c, doz. \$4.00

L. CANDIDUM (Cascade Strain)

This is a new strain of Madonna lily developed over a period of years from the best in foreign and American strains. It is unusual in that it sets seeds freely and is greatly resistant to Botrytis. The bulbs should be planted not later than the 15th of September as their dormant period is very short.

CENTIFOLIUM "OLYMPIC HYBRIDS"

This modern strain of Trumpet Lilies has been proven in field tests to be the finest strain of hardy garden lilies available. Over a period of years crossings have been made with regale, centifolium, Brownii and other trumpet lilies, the best of these seedlings being selected to produce this Olympic strain. There is a pleasing variation among the individual plants, some having long trumpets, others being more wide-open with petals slightly ruffled and twisted. The color range of the parent plants is found in this strain plus lovely shades of creamy yellow, soft fuchsia pink and cool icy green. The plants do best in partial shade. If the flowers are to be used for show purposes they should be given shade as soon as the buds show color.

Large exhibition size bulbs: Each 50c, doz. \$5.00

Good planting size bulbs: Each 30c, doz. \$3.00
